

PASSPORT for HEALTHCARE

CAREGIVER CONVENIENCE + COMPLIANCE

Passport provides all the tools home care service providers need to manage their schedules, and give individualized care to their patients. The simple, unified platform for home care eliminates time wasted managing their schedules, traveling non-optimal routes, and switching between multiple tools to perform quality service.

Passport optimizes home care delivery giving each caregiver more time to spend caring for their patients.

Caregivers' appointments are scheduled by optimized routes and service requirements. Travel routes are provided for the caregiver and locations tracked.

When caregivers arrive at their appointment location, they "clock in" and may begin the specified point-of-care services and documentation securely through the app.

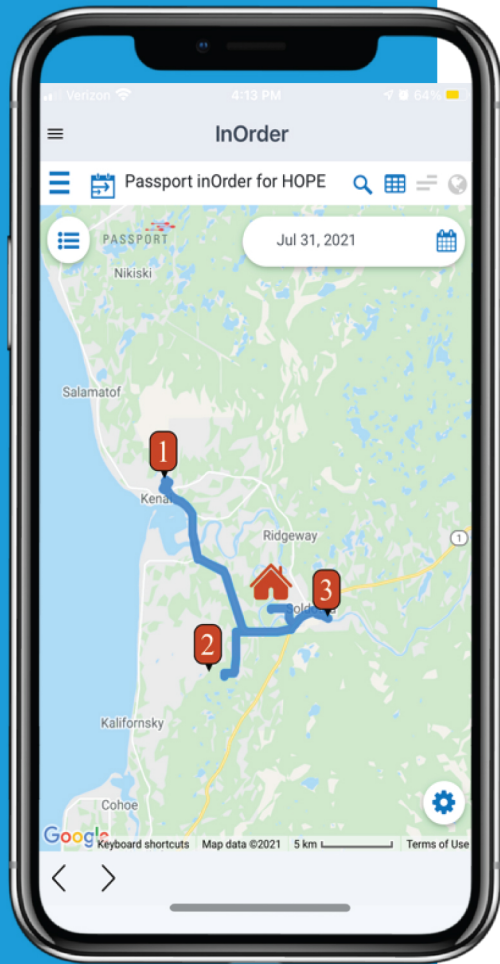

Completing an appointment, Passport captures time-stamped location markers to ensure Electronic Visit Verification for the patient care session.

Available on

SERVICE SCHEDULING & ROUTE OPTIMIZATION

Field management and routing capabilities provide optimal appointment scheduling with real-time corrections giving your caregivers more time with their patients to provide quality, individualized care.

SECURE SERVICE & VISIT VERIFICATION

Case management and data collection flows directly into your existing EHR system through a secure SOC 2 and HIPAA-compliant platform with Electronic Visit Verification compliant with the Federal EVV mandate requirements, giving peace-of-mind to both patients and their service providers.

PLANNED VS ACTUAL ROUTE ANALYTICS

Understand what's happening on the front-line with real-time performance reporting that improves oversight and accountability. Ensure route compliance and see every detail of your route plan vs what actually happened with alerts when things start going wrong.

INCREASED PATIENT & CAREGIVER SATISFACTION

Real-time scheduling adjustments provide both routing and scheduling as well as shift-swapping, which increases caregiver performance and continuity of service quality. The user-friendly platform simplifies workflow, allowing caregivers to focus on doing what they enjoy - providing quality care to their patients.

Passport for Healthcare is a secure platform for home health scheduling, route management, electronic visit verification, and case processing.

The Passport platform integrates with your existing EHR system and leverages the features of industry-leading software partners to provide a unified mobile experience.
