## Event Staffing

Event Scheduling...*Simplified*

Dynamic Event templates

Single click to create, update or remove shifts

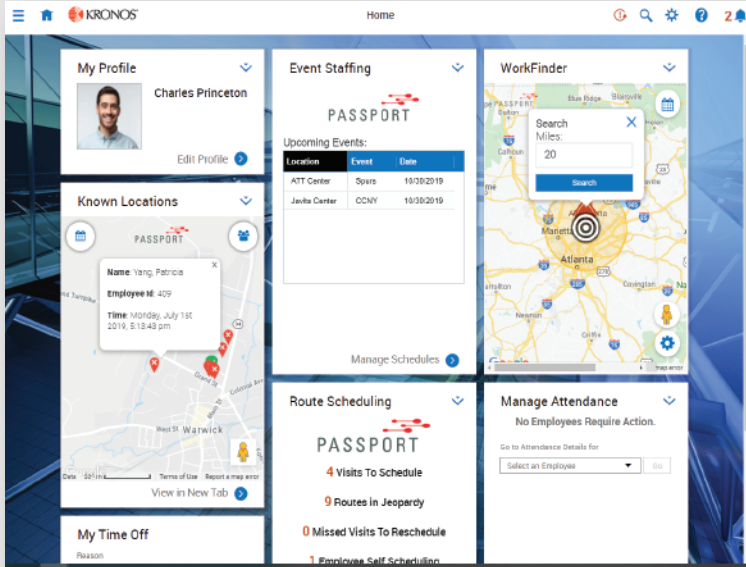

Assign labor categories by event

All key data displayed on one screen

# Passport Enhances Workforce Dimensions Event Scheduling

Simple user interface allows you to see all your key data on one screen, such as attendance, cost, or hours, for making the best staffing decisions.

Simplify event schedule creation and management in Kronos

- Dynamic Event Templates let you create head counts based on location, event type, time of event, and forecast attendance
- Streamlined process to update and/or delete schedules, saving you time and money
- Ability to assign unique Labor Categories to shifts for any event

Integrated with Kronos Workforce Dimensions

- Direct API integration
- Works directly with your Org Structure and Labor Categories
- Integrates into the Kronos WFD user experience with a dynamic Home Screen Tile

Advanced Features:

- Cancel or reschedule an event with a single click
- For traveling staff such as catering, calculate mileage and drive time
- Dynamically shift resources with real time POS system integration
- Filtering allows you to close off work areas that are not operational
